

Angelos Ngabo

Full Stack Developer & Creator

ngaboangelos2@gmail.com | +250 781 889 168 | Kigali, Rwanda
ngabo.vercel.app | [linkedin.com/in/angelos-ngabo](https://www.linkedin.com/in/angelos-ngabo)

Versatile Full Stack Developer, Software Engineer, and Creator specializing in building scalable web applications and optimizing database architectures. Armed with a BSc in Software Engineering, I specialize in translating complex real-world problems into elegant, user-centric software. A proactive builder who takes products from concept to deployment, combining front-end artistry (React, Tailwind) with robust back-end systems (Node.js, SQL).

TECHNICAL SKILLS & TOOLING

Languages	&	React.js, Next.js, TypeScript, Tailwind CSS, Redux, Node.js, Express, Python, Java, Spring
Frameworks:		Boot, REST APIs
Databases & Cloud:		SQL, PostgreSQL, MongoDB, Database Normalization, Firebase (Firestore, Auth), Vercel
Tools & Methods:		Git/GitHub, Docker, Postman, Linux Administration, Agile/Scrum, UI/UX Prototyping

FEATURED PROJECTS (SOLE CREATOR)

SquadPlan – Group Event & Contribution Management Platform

2026

Sole Creator, Lead Full-Stack Developer & Architect

- Developed a web-based, registration-free event coordination and shared-expense tracking platform designed to simplify group planning.
- Engineered a friction-free guest management flow that allows participants to RSVP, view event schedules, and monitor contributions without requiring registration, driving higher collaboration rates.
- Implemented real-time dynamic dashboard features utilizing Firebase Firestore listeners, instantly reflecting attendance changes, budget updates, and personal contribution metrics across active clients.
- Designed an intuitive financial tracking module that auto-calculates total event costs, handles complex expense splits, and updates individual payment statuses in real time.
- Built a responsive mobile-first UI using Tailwind CSS and React, optimizing network payloads to ensure fluid performance on variable mobile connections.

Spendly – Personal Finance & Budget Application

2023

Sole Creator, Lead Full-Stack Developer & Designer

- Solely designed, built, and launched Spendly, a highly secure, end-to-end full-stack personal finance management application designed to enable users to track expenses, manage customized budgets, and analyze complex spending behavior.
- Engineered the entire frontend and backend systems, translating financial requirements into functional transaction handling modules, expense categorization mechanics, and dynamic budget projection logic.
- Designed and integrated optimized RESTful APIs for real-time, low-latency data exchange between client and server, ensuring efficient CRUD operations and data consistency.
- Architected the complete relational database schema for user financial records, optimizing query indexing and database normalization to guarantee system scalability and rapid retrieval.
- Developed a fully responsive user interface utilizing modern layout structures and optimized UI/UX patterns, prioritizing accessibility and ease-of-use.

Rangira Agro-Farming Platform

2022

Sole Creator, Developer & System Architect

- Independently developed, implemented, and deployed the complete digital infrastructure for the Rangira Agro-Farming initiative to improve sustainable production and enhance data-informed planning.
- Developed and integrated custom software features dedicated to supporting farm operations, monitoring complex crop production cycles, and logging pest and disease control interventions.
- Built a robust record-keeping and dynamic performance-reporting module to translate physical farm metrics into practical, analytical, and highly actionable digital solutions.
- Optimized database storage architectures to ensure smooth application performance, fast catalog rendering, and responsive state synchronization under low-bandwidth rural networks.

PROFESSIONAL EXPERIENCE

Freelancer Developer

2023 – Present

Upwork

Remote

- Design, build, and deploy custom full-stack web applications and scripting automations for global clients using React, Node.js, and Python.
- Collaborate directly with international clients to translate complex business needs into clean, robust, and highly scalable software codebases.
- Architect relational database models and secure APIs, focusing heavily on responsive UI layouts, efficient state handling, and strict data security.

AI Marketing Images Creator

2024 – Present

NFINITE Company

Remote

- Leverage advanced generative AI engines and optimized prompt frameworks to produce photorealistic marketing assets and e-commerce visual merchandising.
- Streamline workflow efficiency by designing automated image-processing pipelines, substantially reducing asset turnaround times for major retailers.
- Collaborate closely with creative directors and product managers to ensure all synthetic assets maintain absolute brand alignment and high-fidelity output.

IT Support & Systems Intern

2023 – Present

St. John Tech

Kigali, Rwanda

- Acted as the primary technical contact for 50+ business users, diagnosing and resolving complex software, local networking, and system configuration issues to maintain zero corporate downtime.
- Programmed custom scripting routines to automate software deployments and operating system patching, cutting down manual workstation provisioning times significantly.
- Engineered and managed local LAN/WAN architectures, monitoring network traffic to guarantee optimized bandwidth allocation and system-wide firewall compliance.

IT Intern

2022

Muhima Hospital

Kigali, Rwanda

- Accelerated hospital-wide digital transformation initiatives by digitizing complex medical records and migrating legacy data into secure, structured SQL databases.
- Boosted internal network and server system uptime by 30% through rigorous proactive maintenance, automated diagnostics, and secure client-terminal configurations.
- Performed critical, low-level data recovery operations on corrupted workstation drives, ensuring sensitive, historical patient records were successfully preserved without loss.

Field Marketing Agent

2021

BuySellor Rent Online Market

Kigali, Rwanda

- Analyzed regional market trends and optimized user outreach tactics to boost overall online platform acquisition and conversion rates by 15%.
- Leveraged collaborative leadership skills (developed as Football Team Captain) to coordinate field campaigns, align schedules, and maximize regional presence.

EDUCATION

BSc. in Software Engineering

2023 – Present

Adventist University of Central Africa (AUCA)

Kigali, Rwanda

Completed coursework; currently awaiting official graduation ceremony.

A2 Diploma in Software Development

2020 – 2022

Saint Joseph Integrated Technical College

Kigali, Rwanda

Focus on core programming paradigms, relational database design, systems architecture, and hardware-software integration.

Computer System Technology Certificate

2019 – 2020

Etefop Musanze

Musanze, Rwanda

Certified training in local networking protocols, hardware troubleshooting, operating systems administration, and desktop support.

CERTIFICATIONS

Software Engineering: Certified Software Engineer

Full Stack Development: Certified Full Stack Developer

System Administration: Certified Professional in Hardware Troubleshooting & System Administration

Cybersecurity: Specialized Training in Cyber Security & Ethical Hacking ([Undergoing Training](#))
